Where Everything Is

A document and access index for a household of one. Write where each item lives — a folder, a safe, a binder, or a named digital vault — and who else can find it. Do not write full passwords on this page.

HOW TO USE THIS PAGE

Keep the filled page where a person you have chosen can find it in a hurry. Give them a copy, or tell them where this one is. Review the locations after any move, new policy or new device. For digital accounts, record only a hint (the manager you use, or a sealed envelope) — never the password itself.
